

# Setup Redux

---

## Install Redux React-Redux

```
npm install redux react-redux
```

## Import file

```
import { createStore, applyMiddleware, compose } from "redux";  
import { Provider } from "react-redux";  
import RootReducer from "../Redux/Reducers/root";  
import thunk from "redux-thunk";
```

## Defind Variable

```
const composeEnhancers = window.__REDUX_DEVTOOLS_EXTENSION_COMPOSE__ || compose;  
const store = createStore(  
  RootReducer,  
  // window.__REDUX_DEVTOOLS_EXTENSION__ && window.__REDUX_DEVTOOLS_EXTENSION__()  
  // applyMiddleware(thunk)  
  //Su dung redux thunk middleware voi devtool  
  composeEnhancers(applyMiddleware(thunk))  
);
```

## Apply Provider

```
<Provider store={store}>  
  {" "  
<App />  
</Provider>,
```
